Chinthapenta Srikar

AI/ML Engineer

Portfolio: chinthapenta srikar
github.com/chsrikar
linkedin.com/in/chinthapentasrikar

Objective

Motivated and detail-oriented Computer Science student with a strong foundation in programming, system design, and AI-driven solutions. Passionate about building scalable applications, optimizing workflows, and leveraging emerging technologies to solve real-world problems. Seeking opportunities to apply technical expertise in software development, data systems, and innovative project environments while continuously learning and contributing to impactful solutions.

Skills

Technical Skills

Languages	Python
ML/AI Libraries	NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow
AI Skills	Prompt Engineering, Context Model Engineering, LLMs, Generative AI
Core Expertise	Machine Learning & AI Model Development, Large Language Models (LLMs), System Architecture & Design, Data Engineering & Pipelines, Problem Solving
Tools	Git & GitHub, Vercel, Linux, Raspberry Pi OS, Jupyter Notebook
Communication	English, Telugu, Malayalam, Hindi

Technical Experience

Experience

Young Innovator Intern — **Jun 2024 – Aug 2024**
Scaler School of Technology — *Remote, India*

- Analyzed AI adoption frameworks in early-stage startups, identifying how AI improves product velocity and reduces operational load by 30–40%.
- Built and deployed a personal portfolio website, increasing profile engagement by 100%.
- Conducted YouTube algorithm analysis, identifying 5+ ranking factors influencing content growth.
- Studied marketing fundamentals including customer funnels, segmentation, and campaign strategy.

Python Developer Intern — **Aug 2024 – Sept 2024**
CodSoft — *Remote, India*

- Built a modular calculator application supporting 10+ arithmetic operations with clean and efficient logic structuring.
- Developed a To-Do List application with CRUD operations and persistent storage, improving task management efficiency.
- Created a secure password generator with configurable complexity, improving password strength by up to 80%.

Developer — **Jun 2025 – Present**
ArchConnect — *Remote, India*

- Developed a responsive multi-role web application using component-based architecture, improving scalability and maintainability.
- Built a mobile app prototype using Tile.dev, accelerating UI/UX workflows by 40% using prompt chaining and Tree-of-Thought reasoning.
- Engineered ArchAI using Gemma 3 (4B) for conversational logic with contextual role switching.
- Designed ML pipelines using Random Forest and Monte Carlo methods for cost prediction and project timeline estimation.

Athena AI (Project Experience) — **2025**
Academic / Personal Project

- Developed an AI-driven student performance prediction system using Linear Regression and Monte Carlo Simulation.
- Modeled student outcomes based on study hours, sleep patterns, and performance metrics with visual analytics.
- Executed 1000+ Monte Carlo simulations to generate probabilistic score ranges and confidence intervals.
- Built an interactive interface to display predictions, trends, and insights for academic performance analysis.

Education

B.Tech in Artificial Intelligence & Machine Learning, *VISAT Engineering College* — Jun 2024 — May 2028 (Expected)
Online Degree in Data Science and Applications, *Indian Institute of Technology Madras* — Ongoing
Relevant Coursework: Computational Thinking, Mathematics I, Statistics I, English I, English II, Python (with Labs)

Activities

Leadership & Community CEO, IEDC VISAT, EX-CTO IEDC VISAT; Co-Lead, Mulearn VISAT; Community Head, ADC
Technical Contributions Webmaster, IEEE VISAT EX-CTO IEDC VISAT; Organized and contributed to technical events, workshops, and community initiatives
Events & Participation Participated in coding sprints, technical workshops, and innovation-driven programs
Presentations & Showcases Presented projects and research concepts in college-level showcases and technical forums
